

Croydon Community School & OPTIONS

Using Digital Technology Policy

PURPOSE

To ensure Croydon Community School & OPTIONS is aware of and uses available technology-based teaching and learning resources in a safe and responsible way, to improve student learning.

To ensure the school complies with DET policy and guidelines.

SCOPE

Schools need to use digital technologies as an integral component of their learning and teaching programs safely and responsibly.

Information Technology Division (ITD) coordinates the ICT procurement and infrastructure provision to Victorian Government schools which is central to the effective integration of digital technologies into the curriculum.

The Victorian Curriculum and Assessment Authority website provides the framework for curriculum development for the Information and Communications Technology domain.

A range of online systems, tools and resources are available to support digital learning in schools:

- ICT school planning resources will assist schools to plan for the effective use of digital technologies in their everyday practices to prepare students for the demands of an ever-changing world, to achieve powerful learning and teaching, and improve learning, teaching and administration see: [ICT School Planning](#)
- For resources and professional learning for teachers to build their digital teaching capabilities, see: [Digital Learning for Teachers](#)

POLICY

The school will ensure the following resources are utilised in the delivery of the Information and Communications Technology domain and in the development of the eLearning Plan:

1. [Safe and Responsible Use Resources](#) to support the school community to understand the behaviours and processes that will help them to act in a safe and responsible manner when using digital technologies.
2. [FUSE](#) for access to online educational resources from around the world. Students and teachers will be able to search for websites, interactives, images, audio and video as well as other online resources. Teachers can log into 'My Desk' to manage and upload resources, create resource packages to share and access licenced content. All resources are recommended and reviewed by educators, and tagged according to audience, AusVELS and post-compulsory curriculum frameworks.
3. [Global2](#) is the Department's blogging community and provides space for online collaboration, opportunities for teachers and students to post and comment on blogs, collaborate on wikis, set up discussion forums and embed videos and images. Personal levels of access can be customized for the space.
4. [Virtual Conferencing](#) opens doors to learning outside the classroom. It enables teachers and students to collaborate online with other classrooms, connect with experts or access professional learning. It can be accessed via the internet or by using a dedicated videoconferencing system. It allows for participants in multiple locations to interact using a wide range of media. For more information about the many virtual conferencing tools that Victorian schools have access to, see: [Virtual Conferencing](#)
5. The [Digital Deck](#) is like a pack of cards and provides a quick overview of the range of digital resources available to schools. It starts with an eduSTAR overview then explores other resources and methods along a continuum. Each card has a description, advice for getting started and classroom ideas. The cards are available in hard copy or can be accessed online. For more information, see: [Digital Deck](#)

6. The [eduSTAR software](#) image provides educational software that adds value to teaching and learning. Teachers and students can search the online eduSTAR Catalogue for software by learning area, once authenticated they can download core software and install it on multiple devices. see: [eduSTAR catalogue](#). The three software images available to schools are:
- core image - contains over 80 pieces of software including the Microsoft Office Suite, software for video, image and music creation, thinking skills, literacy, mathematics and science
 - secondary image - contains additional licensed software including the Adobe Suite, Inspiration, and Mathematica
 - tablet image - removes programs that are not compatible with tablet devices.
 - Software is available for Windows and Apple Mac devices, see: [eduSTAR software for Windows](#) or [eduSTAR software for Mac](#)

The use of Department-provided software will comply with relevant legislation and Department policy, protect the personal information of individuals, and respect the individual's right to control how and for what purpose their personal information is used.

The school will:

- educate staff and students on the importance of maintaining privacy when using software and other online services for learning and teaching, see:
- provide parents and carers with an Parents Information Pack on software which includes an Opt Out form, see:
